

**Sprint has released a firmware update for the Samsung Instinct. The update does not update the applications on the Instinct, but rather it prepares the Samsung ROM for application updates which are planned for early August. The much anticipated application updates will include changes to Picture Mail, the web browser, Sprint TV, Sprint Navigation, Sprint Email, Sprint Music Store, Visual Voicemail, Mobile Sync and more. Looks like August will be an eventful and promising month for Instinct owners.**

- Elimination of issues by where data services are disabled without user preference
- Elimination of NAI corruption upon provisioning if new NAI is shorter than the previous
- Reflect reoccurring calendar appointments
- Improved volume □ Bluetooth headsets
- Utilize saved pictures as background image
- Reduce fluctuation in signal bar and other functions related to RF/Network quality
- Eliminate □ echo□ on conference bridge

Discuss the new update in the Instinct forums.
